

# Why did BPM fail?

prof.dr.ir. Wil van der Aalst  
RWTH Aachen University  
W: [vdaalst.com](http://vdaalst.com) T: @wvdaalst

This is what I believed in 1995:

It did not happen ...

BPM IS NOT  
DEAD.

BPM IS NOT  
DEAD.

Miguel Valdes  
CEO and co-founder of BonitaSoft at BPM 2017

BPM2017  
15th International Conference  
on Business Process Management  
September 10-15, 2017  
Barcelona, Spain

# Why?

## human behavior

O2C, P2P processes having  
hundreds of thousands of variants.

## data-driven systems

Information systems having thousands  
of tables with complex dependencies  
recording what people really do.

## actual/effective process improvements

Transforming insights  
into actions (not models  
or PowerPoints).

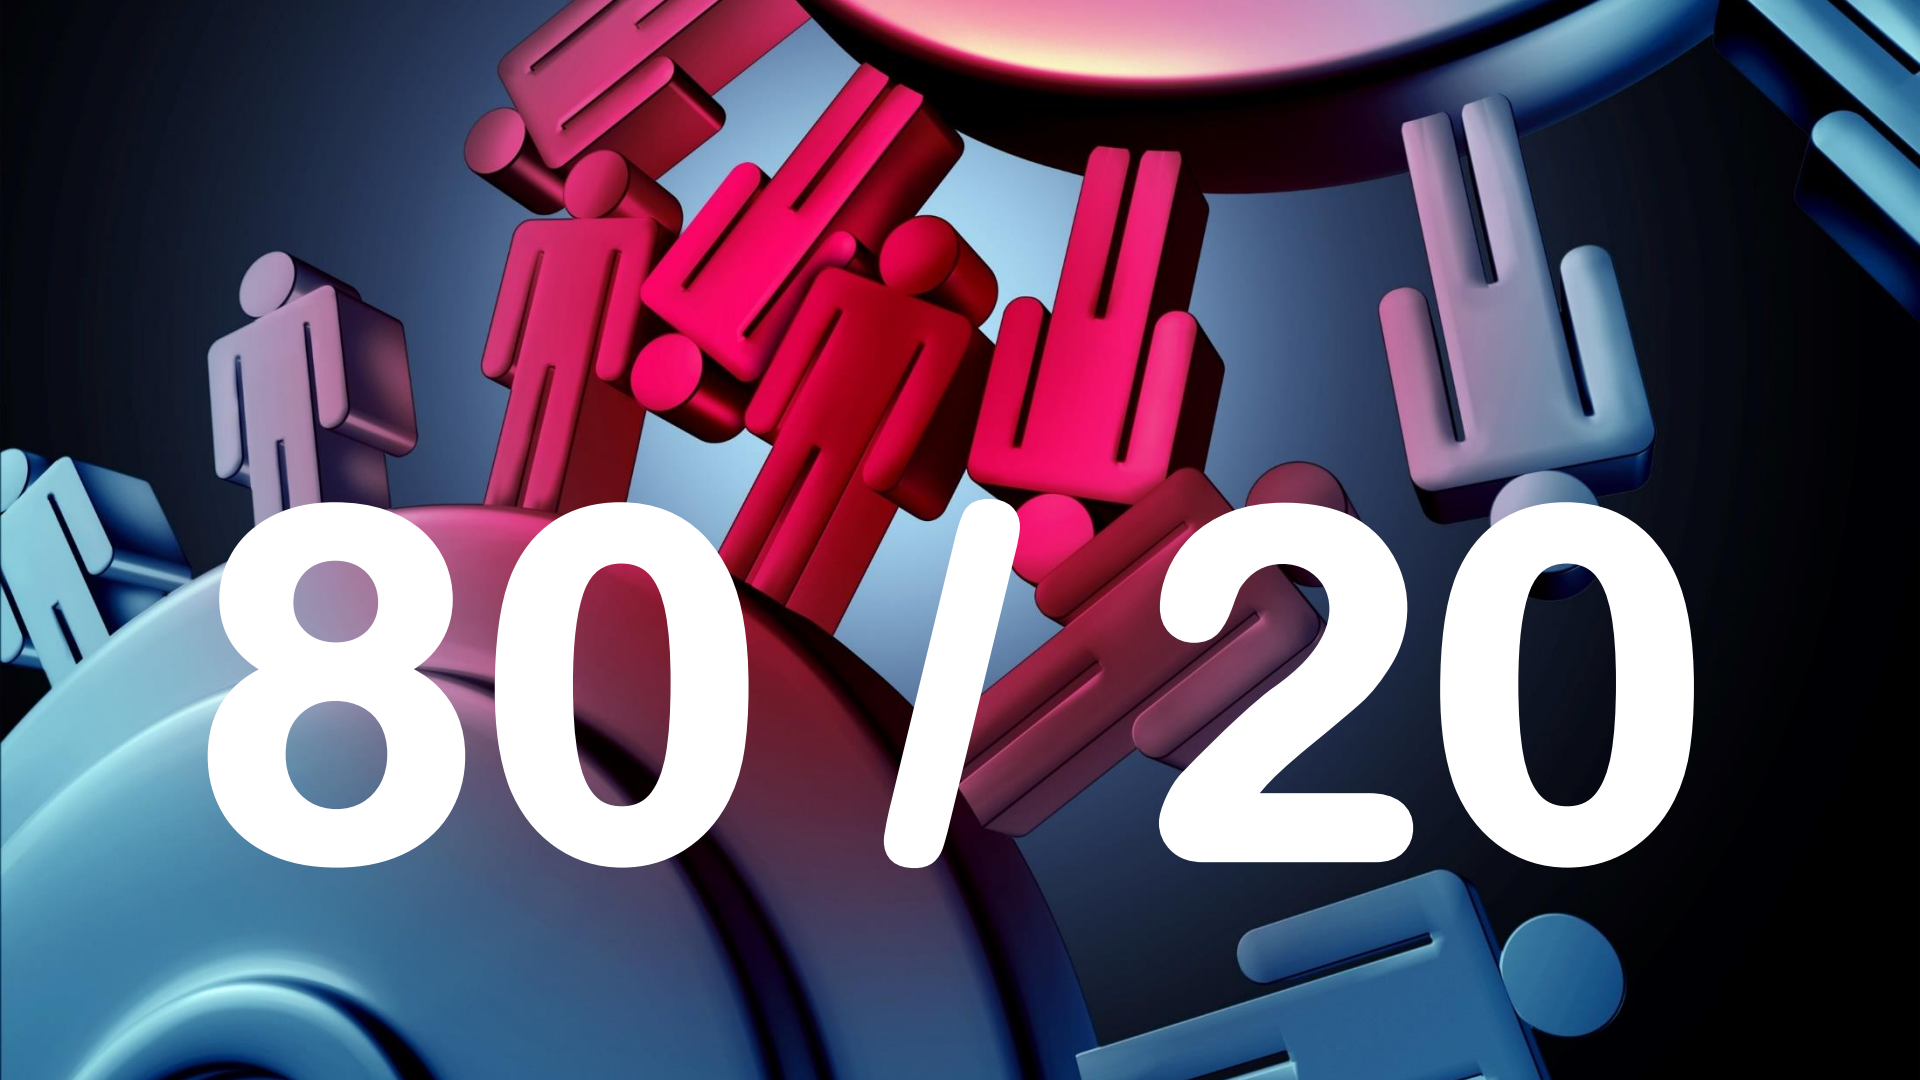

# Process Mining

(initiated from academia)

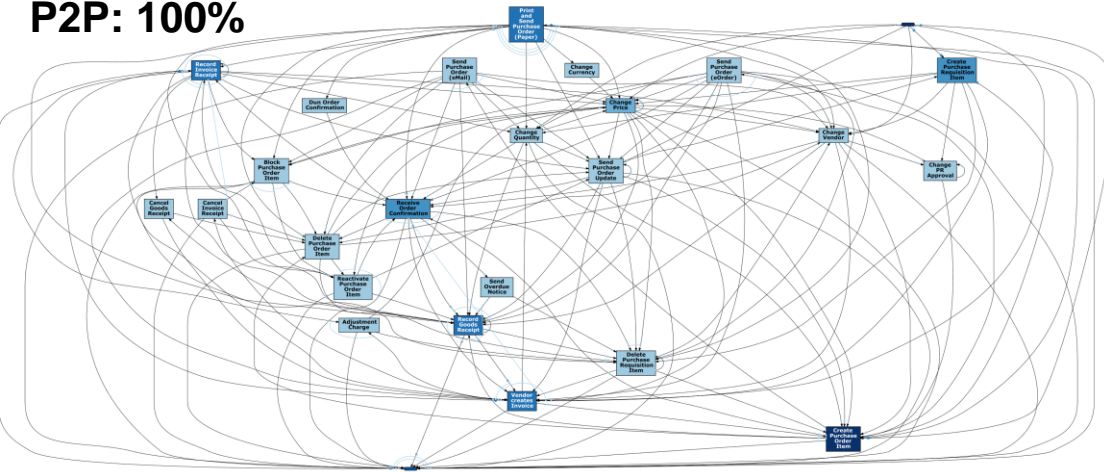

# Robotic Process Automation

(initiated from industry)

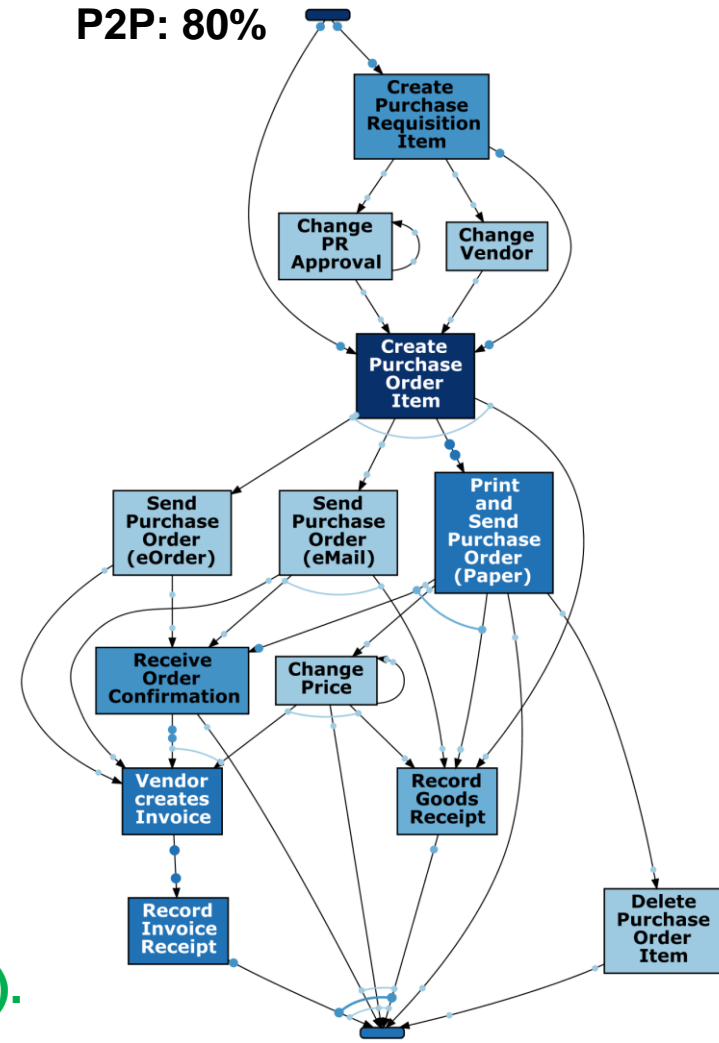

80 / 20

P2P: 100%

P2P: 80%

- The remaining 20% of the cases account for 80% of the variants.
- The remaining 20% of the cases account for 80% the friction (rework, complaints, etc.).
- 80% of the cases are described by 20% of the variants.
- 80% of the cases cause only 20% of the friction (rework, complaints, etc.).

20% of cases is causing  
80% of the friction!

**Deviations**

**Rework**

**Loops**

**Delays**

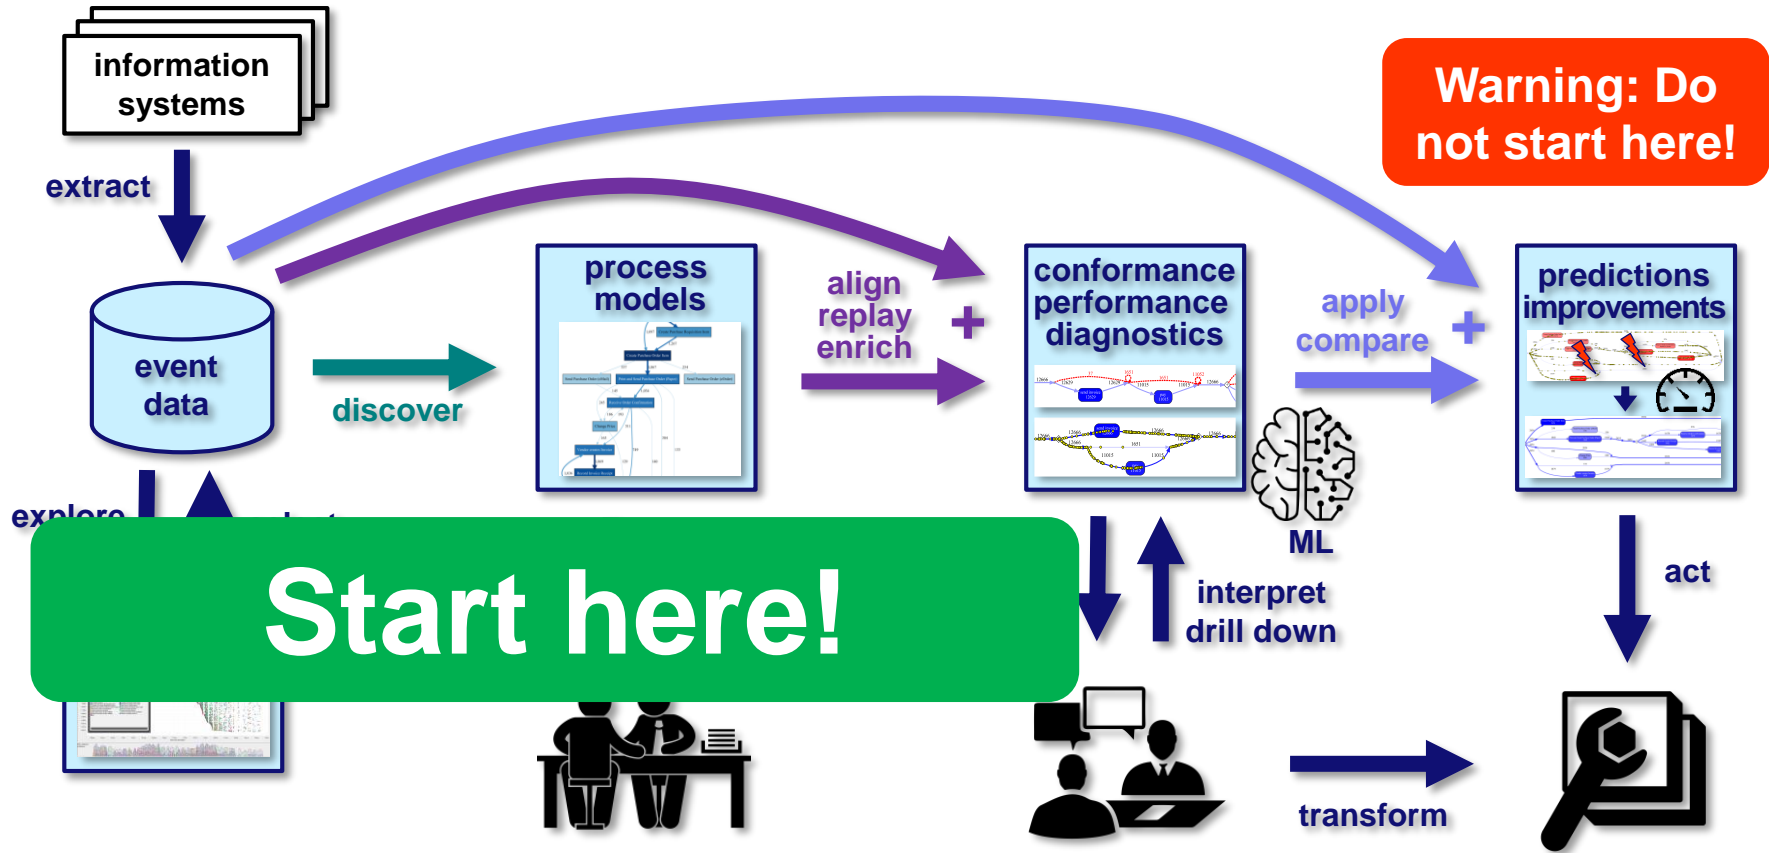

**Unresponsiveness**

**Lost cases**

**Ping-pong**

**Fraud**

# Process mining is used in all domains

- **finance and insurance** (Rabobank, Wells Fargo, Hypovereinsbank, Caixa General, ADAC, APG, Suncorp, VTB, etc.),
- **logistics and transport** (Uber, Deutsche Bahn, Lufthansa, Airbus, Schukat, Vanderlande, etc.),
- **production** (ABB, Siemens, BMW, Fiat, Bosch, AkzoNobel, Bayer, Neste, etc.),
- **healthcare, biomedicine, and pharmacy** (Uniklinik RWTH Aachen, Charite University Hospital, GE Healthcare, Philips, Medtronic, Pfizer, Bayer, AstraZeneca, etc.),
- **telecom** (Deutsche Telekom, Vodafone, A1 Telekom Austria, Telekom Italia, etc.),
- **food and retail** (Edeka, MediaMarkt, Globus, Zalando, AB InBev, etc.),
- **energy** (Uniper, Chevron, Shell, BP, E.ON, etc.),
- **IT services** (Dell, Xerox, IBM, Nokia, ServiceNow, etc.), and
- **consultancy** (Deloitte, Ernst & Young, KPMG, PwC, etc.)!

# Robotic Process Automation

- Unlike PM initiated from industry
- Keep original system
- Bottom-up / quick wins
- Complements process mining
  - automate versus analyze
  - task level versus process level

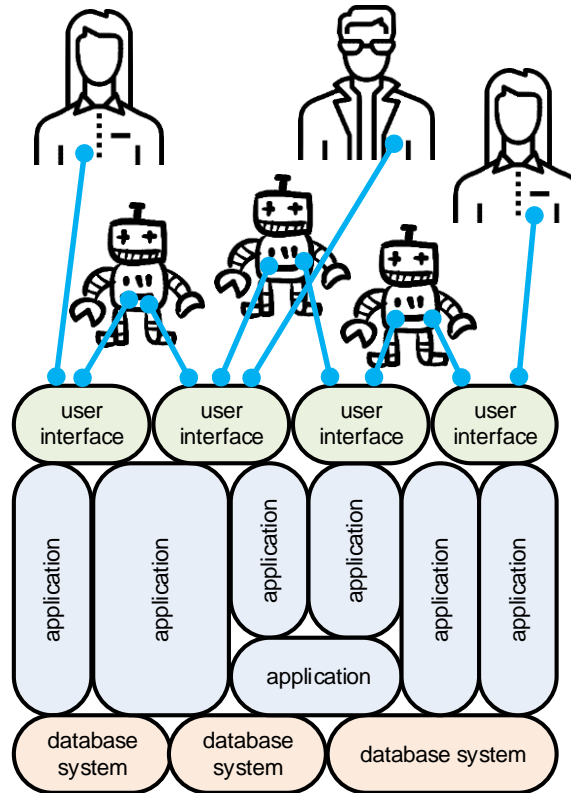

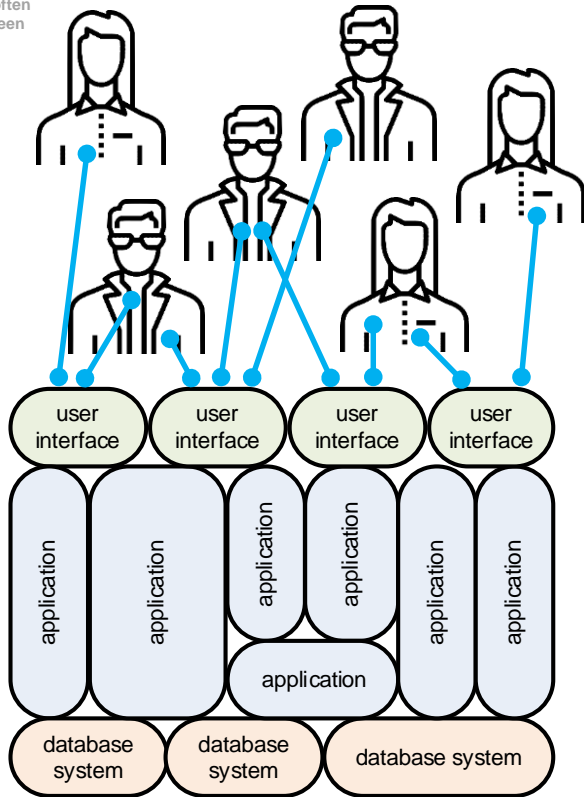

WorkFusion

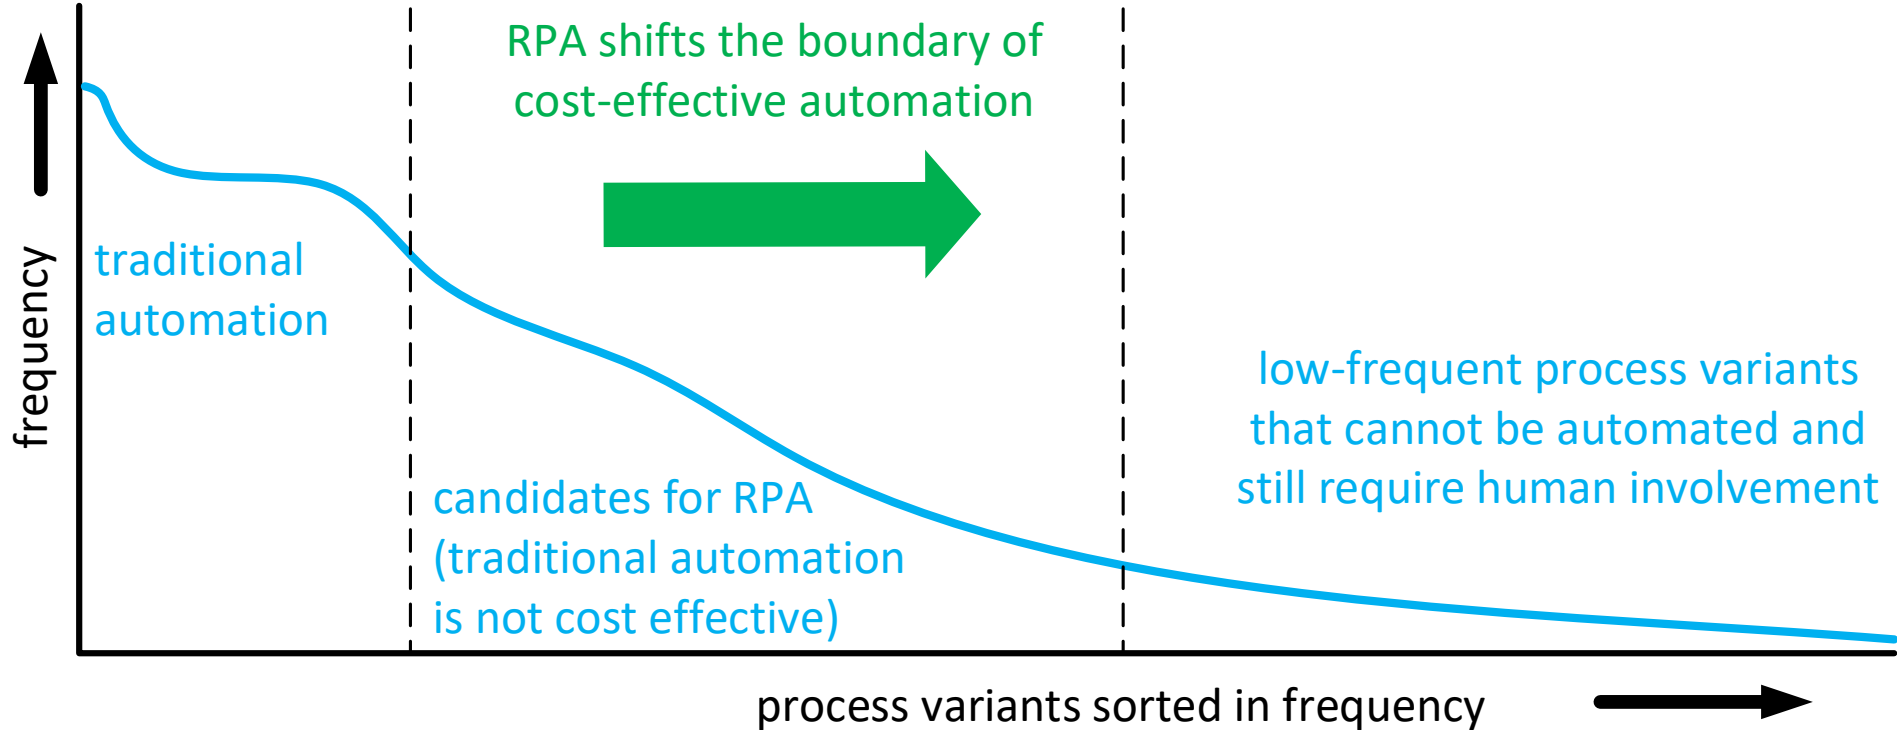

# RPA: The Poor man's WFM system

Humans are often  
the glue between  
applications

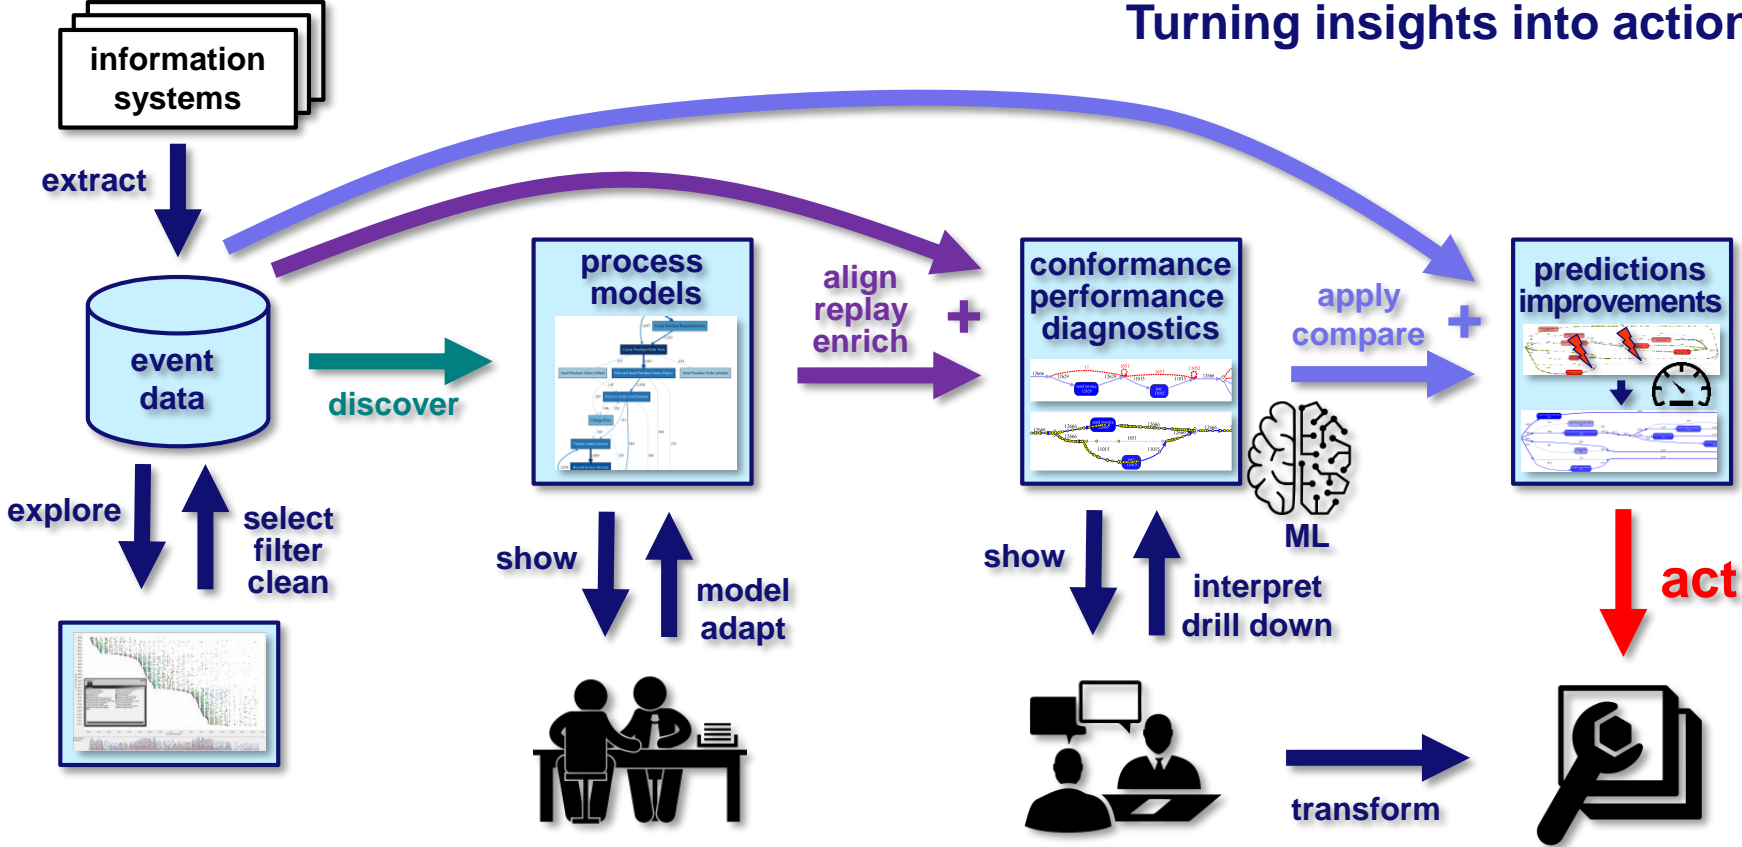

process mining is able to diagnose the full process spectrum  
from high-frequent to low-frequent and from automated to manual

# Turning insights into actions!

# About Automation

- It is very **naïve** to replace existing software with something “fresh” (cf. # applications and # tables).
- Process mining helps to see the **main problems** and can **trigger** actions/workflows.
- Focus on the “**pain points**” and not on the whole to ensure a good ROI.
- **Low-code automation** (e.g., Make/Integromat) and **Robotic Process Automation (RPA)** help to interface with existing systems.

# Conclusion

Traditional  
BPM

# Conclusion

- **Lifelines for BPM:**
  - ✓ Process Mining
  - ✓ RPA
- **Accept people and systems as they are!**
  - ✓ Use event data
  - ✓ Note the 80/20 rule
  - ✓ Focus on improvements
  - ✓ Do not start from scratch
